**Specification**

**Shank pin**

Steel, zinc plated, blue passivated finish

**Securing pawls**

Stainless steel sheet metal AISI 304

**Push button / push rod**

Plastic, Polyacetal (POM)

- Push button: red
- Operating temperature up to 176 °F (80 °C)

**Pull ring / Spring**

Stainless steel AISI 301

RoHS

**Accessory**

Rapid release pins GN 214.2 are used for quick fixing, connecting and locking of various jig and fixture systems. A typical application is location pins which have to be often removed and replaced again.

The rectangular pawls made of stainless steel sheet metal keep the locking pin in an axial position in the bore. It can be retracted by pressing the button, once released it returns the pressure spring into its locking position.

The version with swiveling lifting ring is ideal for the use in confined spaces. The technical appendix contains the load capacities for the double-sided shearing resistance (breaking strength).
