### Information

GN 350.5 leveling sets are used for leveling, adjusting, and linking operations. The spherical washer allows precise installation of two non-parallel planes at a required gradient up to  $\approx 4^\circ$ .

Leveling sets consist of a threaded upper sleeve and a tapped lower sleeve. The fine thread allows stepless, precise setting and locking using a DIN 1810 hook spanner wrench. A circlip serves as a height limiter for the maximum height.
