

**Types of clevis fork joint pins**

Pin with snap-on securing collar

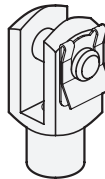

The pin with snap-on securing collar is easily assembled and disassembled. It is therefore particularly suitable for applications where the joint connection has to be released frequently.

Pin with KL circlip

The pin with KL circlip can be assembled and disassembled without tools.

Pin with SL circlip

The pin with SL circlip requires a tool for disassembling (e.g. a screw driver). It is therefore better secured.
