

# GN 810

Steel / Stainless Steel

# Vertical Acting Toggle Clamps

with Horizontal Mounting Base

**JW WINCO**

A Ganter Company

**SS** Stainless Steel

**2 Type**

- A** U-bar version, with two flanged washers
- C** U-bar version, with two flanged washers and GN 708.1 spindle assembly
- E** Solid bar version, with clasp

## Specification

- Case-hardened steel C10 —
- Zinc plated, blue passivated finish
- Tempered bearing pins
- Case hardened bearing rivets (for size 230 and up)

---

- Stainless steel **NI**  
European Standard No. 1.4301 (AISI 304)
- All moving parts  
Lubricated with special grease

---

- Hand grip  
High quality, oil resistant red plastic

---

- Spindle assembly GN 708.1
  - Threaded stud  
Steel, zinc plated, blue passivated finish / Stainless steel  
European Standard No. 1.4301 (AISI 304)
  - Flat spindle tip (type A)  
Black neoprene rubber (CR),  
85° shore A, vulcanized

---

- Mounting holes accommodate inch or metric size screws

---

- **RoHS compliant**

## Information

GN 810 vertical acting toggle clamps work according to the toggle principle: lever and clamping bar move in the same direction. In the clamped position the operating lever is in its vertical position.

Vertical acting toggle clamps in the U-bar version with two flanged washers (type A) can accommodate an application specific clamping screw. A spindle assembly with neoprene rubber tip is also included for type C.

Type E version can either be utilized by welding the clasp which can then accommodate an application specific hold-down fastener component, or by utilizing the bar in conjunction with the GN 809 clamp mounts to hold the work piece in place.
