Specification

- Zinc die-cast
  Powder coated
  Black, textured finish
- Adjustable lever GN 302.1 → *page QVX*
  - Zinc die-cast
    Powder coated
    Black, RAL 9005, textured finish
  - Threaded stud
    Stainless steel AISI 303
- *ISO Fundamental Tolerances → page QVX*
- *Stainless Steel Characteristics → page QVX*
- RoHS compliant

Information

Clamping plates GN 953.7 are used in connection with position indicators EN 953 / EN 953.2. The mounting holes support typical bore hole patterns.

In a simpler manner and without great construction and installation effort these spindles can, after adjustment, be clamped and locked.

At the same time these plates are fitted with bore diameter 6.1 to accomodate the torque support of the position indicator.

The clamping plate can be installed so that the hand lever is situated as required either on the right or the left.
