Information

The clamping bores of GN 131 two-way connector clamps are mechanically machined and designed for GN 990 or DIN 2391, DIN 2395 and DIN 2462 construction tubes. At the screw locations z, the socket cap screws reduce the bore cross-section for clamping. For clamping without tools, the socket cap screws can be replaced by the GN 911 / GN 911.3 adjustable levers listed in the table as accessories.
