**Information**

The clamping bores of GN 132.5 two-way connector clamps are mechanically machined and designed for GN 990 or DIN 2391, DIN 2395 and DIN 2462 construction tubes.

At the screw locations z, carriage bolts and cap nuts reduce the bore cross-section for clamping. Type B is equipped with seals at the screw locations.

For clamping without tools, the cap nuts can be replaced by GN 911.3 adjustable levers listed in the table as accessory.
