Dimensions in: millimeters - inches

### Information

The clamping bores of GN 135 two-way connector clamps are designed for GN 990 or DIN 2391, DIN 2395 and DIN 2462 construction tubes.

The versions with square bores are also suitable for use with profile systems.

The bores and squares are arranged in such a way that an adaptation between different tube cross-sections is possible.

At the screw locations \( z_1 / z_2 \), the socket cap screws reduce the bore cross-section for clamping.

For clamping without tools, the socket cap screws can be replaced by the GN 911 adjustable levers listed in the table as accessories.

### Accessory

- Adjustable levers GN 911 → page QVX

### On request

- Other bore and square combinations \( d_1 / s_1 \) and \( d_2 / s_2 \)

### How to order

GN 135-B30-V40-60-2-SW

1. Bore \( d_1 \) (Square \( s_1 \))
2. Square \( s_2 \) (Bore \( d_2 \))
3. Clamping length \( k_1 \)
4. Identification no.
5. Finish
