Information

The clamping bores of GN 192.5 T-angle connector clamps are mechanically machined and designed for GN 990 or DIN 2391, DIN 2395 and DIN 2462 construction tubes.

At the screw locations z₁ / z₂, the carriage bolts and cap nuts reduce the bore cross-section for clamping. Type B is equipped with seals at the screw locations.

For clamping without tools, the cap nuts can be replaced by the GN 911.3 adjustable levers listed in the table as accessories.
