The clamping bores axes of the T-angle connector clamps EN 192.9 lie in the same plane, arranged in a T-shape. They hold typical construction tubes with full surface contact over the entire cross-section of the bore.

At the screw locations \( z \), the socket cap screws reduce the bore cross-section for clamping. Adapter bushings EN 290 can be used to reduce the bore cross-sections to a smaller diameter.

For clamping without tools, the socket cap screws can be replaced by the adjustable levers GN 911.9 listed in the table as accessories.

### Information

#### Specification

- **Body**
  - Plastic
    - Technopolymer (Polyamide PA)
    - Glass fiber reinforced
    - Temperature resistant up to 212 °F (100 °C)
    - Black, RAL 9005, matte finish
    - Gray, RAL 7040, matte finish
- **Socket cap screws DIN 912**
  - Stainless steel AISI 304
- **Hex nuts DIN 985**
  - Stainless steel AISI 304
  - Self-locking with polyamide ring
- **Load Rating Information** → page QVX
- **Plastic Characteristics** → page QVX
- **Stainless Steel Characteristics** → page QVX
- **RoHS compliant**

#### Accessory

- Adapter bushings EN 290 → page QVX
- Adjustable levers GN 911.9 → page QVX

### How to order

**EN 192.9-B30-B30-44-2-S**

1. Bore \( d_1 \)
2. Bore \( d_2 \)
3. Clamping length \( k_1 \)
4. Identification no.
5. Color
