Information

The clamping bores of GN 195 T-angle connector clamps are not machined and designed for GN 990 or DIN 2391, DIN 2395 and DIN 2462 construction tubes.

The versions with square bores are also suitable for use with profile systems.

At the screw locations z, the socket cap screw reduce the bore cross-section for clamping.

For clamping without tools, the socket cap screw can be replaced by a GN 911 adjustable lever listed in the table as accessory.
