Dimensions in: millimeters - inches

¹ s	² b	Length l
0.3 0.01	10 0.39	21 0.83
0.4 0.02	10 0.39	29 1.14
0.6 0.02	10 0.39	45 1.77
0.8 0.03	10 0.39	60 2.36

Specification

- Steel
- RoHS compliant

Information

GN 374 flat springs are an ideal and almost wear-free connecting link between the GN 264 scale ring and the spindle or GN 268 collar bushings.

When adjusting the spindle, they ensure that the scale ring is safely driven without impairing the setting options of the ring when the shaft is at rest.

Two GN 268 collar bushings along with three GN 374 flat springs are required to complete one GN 264 scale ring set.
