- RoHS compliant

Information

GN 425.9 folding handles are used where the handle must only protrude a short distance in the resting position.

Folding handles identification numbers 1 and 2 are suitable for side "access", as these have a 90° limit stop. If used from above, identification numbers 3 and 4 with a handle that can fold freely through 180°

The retaining springs of identification numbers 2 and 4 keep the handle in any position. This keeps the handle in a position that can be easily accessed and prevents noise as a result of vibration in the resting position.

The handle and the retaining springs are secured by mounting the attachment across the entire surface. All components are supplied unassembled.

• Folding Handles with Recessed Tray GN 425.8 (Steel / Stainless Steel) → page 163
