Snap Latches
Technopolymer Plastic, with Gripping Tray

Snap latches EN 449.4 combine the function of a gripping tray with that of a snap latch to provide an easy way to keep doors and covers closed.

The door can be opened by pulling towards the operator at the release point, this release point is identified by the triangle marker on the exterior latch.

The mounting hole must be created according to the dimensions specified in the mounting information.

For mounting, first insert the front body into the hole in the door, then push in the housing from the opposite side. Use the two supplied self-tapping screws to join the housing with the front body.

Finally, orient the snap element based on the reference marks and mount it on the frame or profile.

Dimensions in: millimeters - inches

Specification

• Front body
  Plastic
  Technopolymer (Polyacetal POM)
  - Temperature resistant up to 140 °F (60 °C)
  - UV resistant
• Housing / snap element
  Plastic
  Technopolymer (Polyamide PA)
  - Glass fiber reinforced
  - Temperature resistant up to 140 °F (60 °C)
  - UV resistant
• Color
  Black, matte finish
  SW
• Self-tapping screws ISO 7049-ST3.5x19
  Stainless steel
• Plastic Characteristics → page QVX
• RoHS
