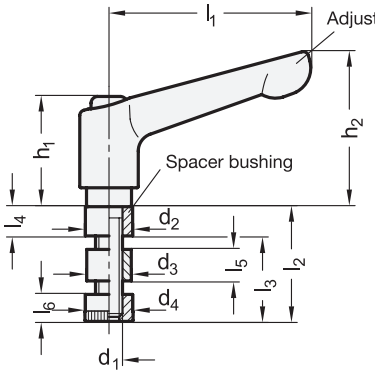
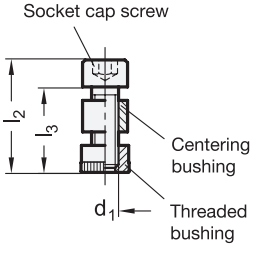
Clamping Kits

Zinc Die-Cast, Stainless Steel Insert, for Swivel Mounting Clamps

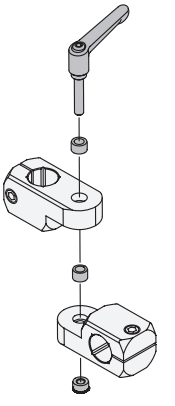
Type **K**



Type **S**



Mounting example



Metric

3 Type

S With socket cap screw ISO 4762

K With adjustable lever kit

Specification

Lever body
Zinc die-cast
Powder coated
Silver, RAL 9006, textured finish

Insert / Retaining screw / Distance sleeve / Centering bushing / Threaded stud
Stainless steel AISI 303

Socket cap screw ISO 4762
Stainless steel A2

RoHS

With clamping kits GN 511.1 swivel mounting clamps GN 482, T-swivel mounting clamps GN 483 as well as attachment swivel mountings clamps GN 484 with the same k dimensions can be combined to mounting clamp joints.

The centering bushing positions and supports the swivel mounting clamps in relation to each other. During assembly, the knurled threaded bushing is inserted by the clamping screw itself or by pressing into one of the two swivel mounting clamps and is then used to clamp the joint.

Lubrication of the thread and the contact surface of the screw or lever increases the clamping force and reduces wear.
