

- 1** Type
- A Without stop
 - B With stop

Specification

- Plastic
Polyamide (PA)
 - Black
 - Temperature resistant up 194 °F (90 °C)
- Plastic Characteristics → page QVX
- RoHS compliant

Information

With EN 646.5 brakes, the speed of the material conveyed is reduced, the transport is disrupted or stopped completely. They are mounted by snapping them on.

In type A without stop, the brakes can also be mounted on the bottom side of the conveyor roller track. However, this is only useful with EN 646.1 conveyor roller tracks made of polyurethane (TPU).
