4

NI

Retaining profiles EN 6473.1 are required to fasten side guide segments EN 6473. Connecting elements EN 6473.2 are used for the installation on conveyor sections and the like.

Retaining profile type G can be installed without alteration. For type O, the user must create the bores as needed.

The retaining profiles are delivered in packaging units of 2 pieces each. They can be shortened as needed.
