Short press-fit ball plunger GN 614
Version MS or KU

Countersunk washer GN 184

GN 750 control lever with GN 614 short press-fit ball plunger (→ page 1026), mounted with a cross pin. The arrangement of the ball plunger facilitates simple installation; if desired the detent cone can be drilled out in the hub before the ball plunger is installed. The recessed shaft and the bore for the spring plunger are hidden by the cover.

GN 750 control lever with hub keyway / parallel key, mounted axially by GN 184 countersunk washer (→ page 1150), with an annular groove for attaching pins to limit the angle of rotation.
