Dimensions in: millimeters - *inches*

**How to order**

1. Pin diameter d₁
2. Stroke l₁
3. Type
4. Coding
5. Material

**Information**

GN 814 lockable indexing plungers are used for applications where unauthorized operation is to be prevented. Types A and AK secure the plunger pin in the extended position after locking. Types E and EK additionally secure the plunger pin in the retracted position if it is not to protrude temporarily.

The key can be removed in the end positions. Locks with coding SC are keyed alike, allowing each lock to be operated with the same key. Locks with coding SU have different locks with 68 different lock versions and correspondingly numbered keys.

For assembly, the indexing plunger can be screwed in or out via a hex socket, which is only accessible when the knob is pulled back. If necessary, lock nuts should be secured against tampering, e.g. by gluing or welding.

**Specification**

- Threaded body
  - Stainless steel AISI 303
    - Plunger pin chemically nickel plated
  - Stainless steel AISI 301
- Knob
  - Plastic (Polyamide PA)
    - Black, matte finish
  - Temperature resistant up to 176 °F (80 °C)
- Spring
  - Stainless steel AISI 301
- Lock mechanism
  - Zinc die-cast / stainless steel
- Key (two pieces)
  - Steel, nickel plated
- Hex nut ISO 8675
  - Stainless steel AISI 304
